

May 2020 Update

Design east of Corbett Road to US 41

Lee County is designing the widening of Littleton Road from east of Corbett Road to US 41. It will be a three-lane roadway, one lane in each direction with a center turn lane (with landscape planting islands). As part of the proposed design, landscape planting islands will be interspersed into the center turn lane where there is space to accommodate them.

This project will tie into the Kismet Parkway/Littleton Road Realignment project that is now under construction. For more information about design and view the draft plans, please visit the design page on the project website at www.littletonroadwidening.com.

Construction Kismet Parkway to east of Corbett Road

The contractor continues to build the segment of Littleton Road from Kismet Parkway/NE 24th Avenue to Corbett Road. This new roadway will be south of the existing road and have two travel lanes in each direction, bike lanes, sidewalks, and intersection lighting. Existing Littleton Road will be maintained as a frontage road, providing access to the properties on the north side. Crews are also currently building the roundabout at Corbett Road.

The next phase of work will include connecting the roundabout to the eastern segment of Littleton Road. This is expected to begin in early summer. Construction of the intersection of Littleton Road at Kismet Parkway/NE 24th Avenue will be the final phase of work to the east of Corbett Road. While construction progresses, motorists should expect lane closures, flagging operations, a temporary signal at Corbett Road, and possible delays. Construction of the western segment of Littleton Road, from NE 24th Avenue/Kismet Parkway to Corbett Road, is anticipated to be completed by the end of 2020.

For more information about the construction, including roundabout information, please visit the construction page on the project website at www.littletonroadwidening.com.

Due to the COVID-19 pandemic, a public meeting will be scheduled at a later date.
